

Cisco TelePresence™

Axonex, a Cisco Advanced Unified Communications Partner, is also the leading regional Cisco TelePresence™ Video Express Authorized Technology Provider. Allied to unrivaled expertise in the integration and support of Cisco based Unified Communications solutions, with a specialist team of engineers, holding an extensive range of advanced Cisco accreditations, Axonex are the perfect partner to deliver integrated Cisco TelePresence solutions.

What is Cisco TelePresence?

Cisco TelePresence enables video based, face-to-face, boardroom to desktop, high-definition, collaboration for organisations, teams and individuals.

Cisco TelePresence is an integral component of Cisco's Collaboration Architecture allowing companies and users to collaborate with a rich and secure portfolio of Unified Communications solutions including IP communications, conferencing, contact center, presence and unified messaging – creating engaging and productive collaborative experiences.

Cisco TelePresence Portfolio

Axonex supply, integrate and support a comprehensive range of Cisco TelePresence solutions covering a product portfolio of Multipurpose and Personal High Definition endpoints, infrastructure and management applications and devices. This innovative, scalable technology has been designed to meet the specific requirements of teams and individuals

Cisco Finance

The Cisco EasyLease program has been designed specifically businesses to finance technology solutions and take advantage of Cisco technology including Cisco TelePresence with maximum flexibility and no upfront cost.

The Axonex Demo Suite – Experience Cisco TelePresence

The Axonex Demo Suite is designed to enable organisations and teams to experience the rich features and benefits of Cisco TelePresence and other Cisco technology solutions, via an extensive suite of compelling demonstrations.

Please contact Axonex for more information on Cisco TelePresence

Cisco TelePresence Benefits

Deploying HD Cisco TelePresence solutions drive significant benefits for organisations, teams and individuals.

- **Intelligent Decisions**
Face to Face, faster and smarter decisions with co-workers and teams extending to partners and suppliers
- **Reduced Travel**
Cutting travel costs and giving employees more quality time, improving quality of life
- **Boosting Sustainability**
Less travel means fewer carbon emissions, supporting organisational environmental sustainability objectives
- **Increasing Collaboration**
Unified communications and other applications such as Cisco WebEx™ allow an inclusive experience for all employees including those remotely located.
