

# Cisco TelePresence™

## Cisco TelePresence MX200

The Cisco TelePresence portfolio creates a face-to-face experience—empowering you to collaborate with others like never before. Through a powerful combination of technologies and design that allows you and remote participants to feel as if you are all in the same room, the Cisco TelePresence portfolio has the potential to provide great productivity benefits and transform your business. Many organisations are already using it to increase collaboration, reduce travel, control costs, make intelligent decisions faster, improve customer intimacy, scale scarce resources, and speed products to market.

### Cisco TelePresence MX200 Overview

The Cisco TelePresence MX200 makes telepresence more accessible to teams everywhere with ready-to-use simplicity and high quality at value pricing. Installed in approximately 15 minutes, the Cisco TelePresence MX200 reinvents the team meeting room experience. The system offers the high-quality, easy-to-use telepresence experience that you have come to expect from Cisco, combined with simple installation, global service, and a price performance that makes broad deployment easier and more affordable than ever.

Whether you are just getting started with video communications or are planning to video-enable your entire organization, the Cisco TelePresence MX200 can meet your needs, delivering 1080p high-definition (HD) performance in a simple, intuitive design.

The Cisco TelePresence MX200 is self-configuring with Cisco Unified Communications Manager and Cisco TelePresence Video Communication Server and includes a Cisco TelePresence C Series Codec, and is interoperable with the complete range Cisco TelePresence systems portfolio including the EX60/90, E20 and MOVI personal TelePresence solutions.

The Cisco TelePresence MX200 forms part of the broad portfolio of Cisco TelePresence and Unified Communications systems offering immersive, multipurpose, and personal endpoints to meet the needs of organisations of all sizes.
